Integrity Roofing, LLC Graduates Seven People from “Preferred Installer by Simonton” Bronze Installation Training Program

Lee’s Summit, MO – Need a window replaced? Just ask for one of the newly-trained “Preferred Installer by Simonton” Bronze professionals at Integrity Roofing, LLC to complete the job.

Simonton Windows® recently conducted an intensive installation training program for the employees of Integrity Roofing, LLC in Lee’s Summit, MO. Those individuals who successfully completed the intense program --- Blake Clarkson, Monty Todd, Steve Wilson, Jamie Christenson Sr., Jamie Christenson Jr., Marvin Pinto and Carlos Pinto --- are now recognized with Simonton Preferred Installer designation.

“When it comes to homeowner callbacks related to windows, installation problems are often one of the largest reasons cited,” says Clarkson, President, of Integrity Roofing, LLC. “Now Simonton Windows has developed a way to help building industry professionals gain more window knowledge and tackle this challenge. We believe this training will result in more satisfied homeowners and properly-executed window installation projects in the Kansas City area.”

The session included classroom work, hands-on installation and field repairs, along with requiring the participants to pass a written examination. Led by Simonton product experts, the class included a review of a window anatomy, the basics of installation, field repairs review and a troubleshooting session. A window care and maintenance section was also included.

“For peace-of-mind and a properly-installed window project, we encourage homeowners to request a Preferred Installer by Simonton representative,” says Clarkson. “This description immediately identifies the person to a homeowner as someone who is factory-trained by Simonton in installation techniques and troubleshooting. This can help assure a positive window installation experience.”
